

# UNIQUE FEATURES OF FLEXFUSION GEN2 ELECTRIC & GAS COMBI OVENS

With a range of combi ovens designed to ensure even cooking and easy cleaning, Henny Penny is helping you prepare more customer favorites than ever — and spend less time cleaning up afterward. Our latest generation of FlexFusion combis offer several new features like an updated operating system, sustainability enhancements, and digital connectivity that make these ovens a top choice for efficiency and quality.

## 1. New MagicPilot Touch & Swipe Operating System

- Intuitive and easy to use
- Precise and simple operation
- Improved color contrast
- Larger, higher resolution pictures

## 2. EasyLoad Crosswise Tray Insertion

- Ergonomic design
- Provides a secure grip for heavy trays

## 3. Double Capacity with FlexiRack

- Substantially increase cooking capacity
- Reduce energy consumption
- Enhance productivity

## 4. Guided Cooking with Chef's Help

- Step-by-step instructions throughout cooking
- VideoAssist accessible 24/7 with simple, clear video
- MultiCook intelligent cooking time control

## 5. WaveClean 100% Automated System

- Just insert a cartridge for easy cleaning
- Full interior cleaning with a single cartridge (including the glass pane)
- Safe and simple – no direct contact with cleaning agent

## 6. Sustainability Features

- True triple-pane glass door
- Integrated LED lighting saves approximately 0.5 kWh
- Heat exchanger saves up to 2 kWh
- GreenInside feature tracks and displays energy consumption

## 7. Improved Lighting

- LED door lighting illuminates the cooking chamber
- Inward-directed lighting for better visibility
- Enhanced user-friendliness and energy efficiency

## 8. DynaSteam

- Boilerless steam generation saves energy
- Automatically adjusts steam quantity for efficient cooking
- Reduces lime buildup inside the oven

## 9. Connected Features

- WLAN (standard feature in certified countries)
- Connected Kitchen cloud-based solution
- OPC UA6 interface for connection to kitchen control systems
- REST API interface for integration with other platforms (apps, SAP, etc.)
