FlexFusion™ Air

Integrated Hood for FlexFusion™ Combi Ovens

MM10036120 Integrated hood

The Henny Penny FlexFusion Air integrated hood for FlexFusion Platinum combi ovens offers a low-cost venting solution that gives operators the flexibility to position combi cooking anywhere there is not a dedicated ventilation system.

This lightweight integrated hood is mounted directly to FlexFusion Platinum combi ovens. No additional external venting required. Hood switches ON/OFF automatically and does not require any additional media connections such as water supply or drainage.

The FlexFusion Air is ideal for retherming and other common cooking functions that do not produce

excess grease vapors or smoke.

With the integrated hood option, guests and crew will experience a more pleasant environment, free of condensation.

Dimensions hood only

Height	15.50 in (394 mm)
Width	39.50 in (1002 mm)
Depth	45.00 in (1142 mm)

Weight

66 lbs (30kg)

Noise level

< 65 db

Additional specifications for oven
